

How to use the filters; Diego_Filling Plus and Diego_PosterizeFilling

Install the filters; Diego_Render_Filling Plus & Diego_Render_PosterizeFilling

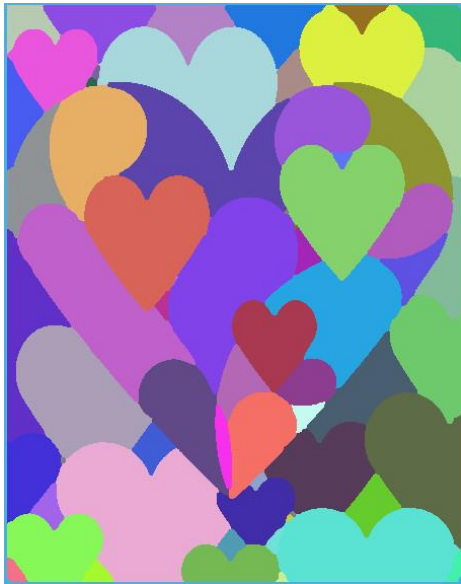

- 1- Open a draw “ArtLine” better if the draw has close the lines in its whole joints.
- 2- Go to Colors – Threshold and accept. (This action clean the whole draw from imperfections)

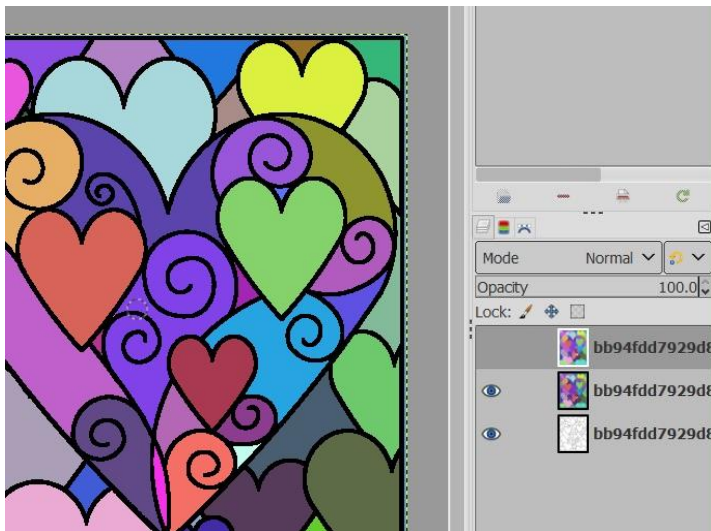

Go to Diego – Render – Filling Plus. Choose your option , gradients, patterns or colors.

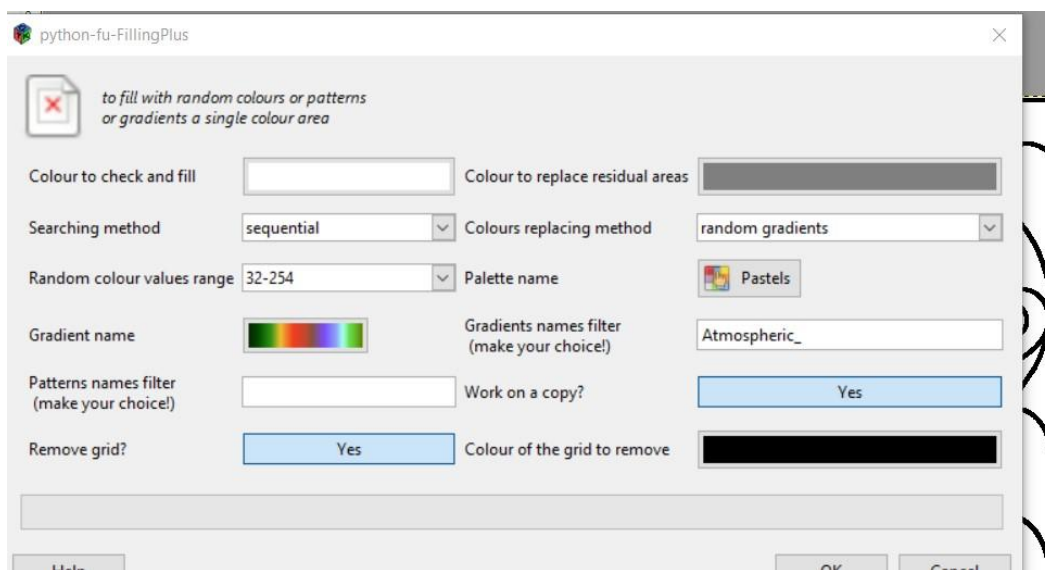

If we choose by default (colours) this is the result:

Both of these results come from the same action, by closing the eye of first layer.

If we choose gradients, choose random gradients in replacing method and write the gradient name where the filter will look for from.

This is the result:

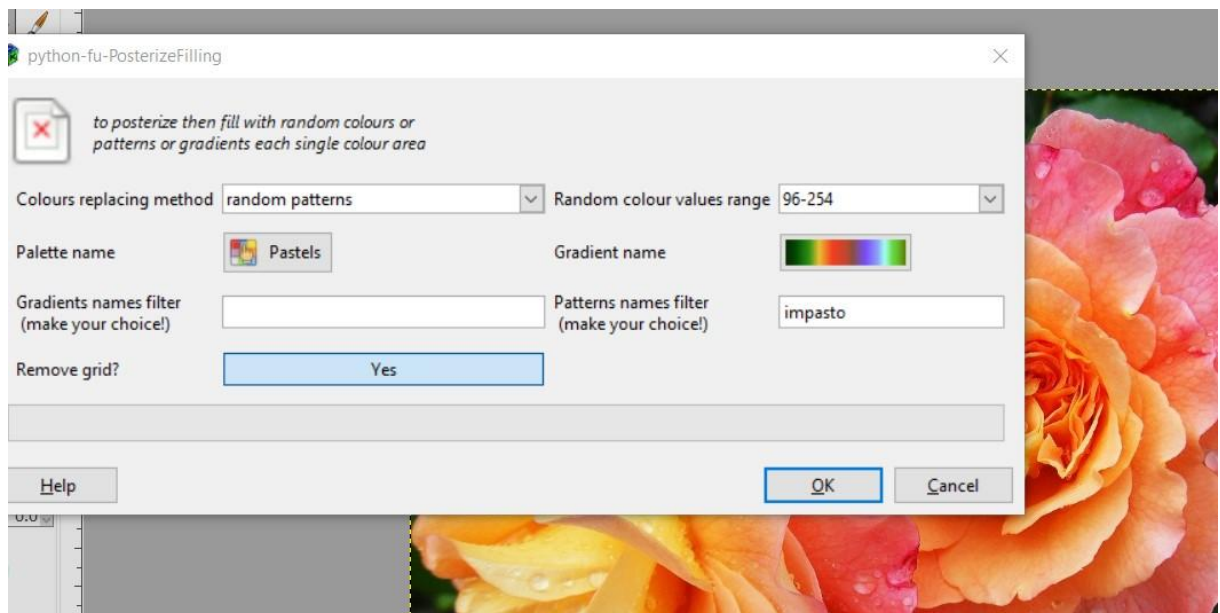

How to use the filter: Diego_PosterizeFilling

Open a image jpg

Go to Diego – Render – PosterizeFilling

Choose your option from colours, gradients or patterns

This time, we choose patterns and write the name of patterns to choose.

This is the result:

I hope this short guide can be some helpful
